

North South University

Department of Electrical and Computer Engineering

CSE327: Software Engineering

Spring 2020

End-of-Semester Assignment (Second Component)

Project Report (Group)

Each student should be submitting a project report. However, each student is not required to write individual report, but can simply submit the one prepared by the group as a whole. The Project Report should contain the following sections

- Introduction
 - A brief description of the project (One paragraph is fine)
- Administrative information
 - Group member names, student IDs and email addresses
 - Bitbucket repository address
- Project status
 - List of proposed use cases compared to the list of completed use cases
- Over final system design
 - A diagram showing the different components of the final system and how they interact
- Detail of different platforms
 - Platform 1:
 - Screen shot per use case with brief description
 - Platform 2:
 - Screen shot per use case with brief description
 -
- API Details
 - For each REST/other API made provide a brief developer documentation. Also indicate where in your Bitbucket repository can the relevant code (API/Business logic) be found.

Submission: Each student should submit a PDF/Word file via the “End-of-Semester Assignment” which can be found in the CSE327 Google Classroom. Files must be submitted by the 4th of June 2020.
